

greenhub is a sustainable construction company that aims to provide design and consultancy solutions on energy efficiency and environmental conservation systems, that can be utilized by various infrastructures. We aim to ensure buildings and structures have lower utility bills and integrate to their immediate environment.

How a Solar Water Heater Pump Saves

Water heaters are the second highest source of energy usage in a home, and for the average homeowner energy means money. Solar water heaters can help you save on electricity cost by providing you with warm water all year round.

Using sunshine to heat or preheat your water can cut your annual hot water costs in half. An ENERGY STAR certified solar water heating system can cut your annual hot water costs in half, and is generally designed for use with an electric or gas back-up water heater.

150 Litres	70,000 Kshs
200 Litres	100,000 Kshs
300 Litres	130,000 Kshs
